

# Palletizing Computers

# PACKAGING GUIDE

**1** Begin by placing four computer towers on each corner of the pallet. Be sure that these towers are placed flat on the pallet

**2** Fill in the narrow spaces by placing computer towers upright between the towers in the corners.

**3** Continue stacking the computer towers. Stack the towers flat on the corners and upright within the gaps.

**4** Stop when the towers are between waist and chest high.

**5** Use shrink wrap to secure the load. Pull the shrink wrap tight as you go around the corners and wrap at least 5 times around..

**6** 80-gauge shrink wrap works well for wrapping computer towers. Give the material a push to ensure it is wrapped securely and is stable. Continue wrapping if needed.
